

NOTE: This tent requires two person to assemble it properly.

TIP: Lay out all components of the tent on a flat surface and familiarise yourself with them before starting assembly.

STEP 1

Locate the cross sleeves of the tent cover.

STEP 2

Insert the rods into the cross sleeves of the tent cover until they come through on the other side.

STEP 3

Insert the rods into the side sleeves of the tent cover to form up the structure of the tent shown above.

STEP 4

Insert the rods into the rod holders at each corner of the tent structure.

STEP 5

Secure the rod holders to the ground with the supplied pegs by driving the pegs into the ground.

STEP 6

Lift up the door section of the tent and slip the ring into the supplied steel pole. Do this for the other side too.

STEP 7

Use the guy rope to tie the steel pole to the ring as shown. Repeat process for other side.

STEP 8

Secure the guy ropes to the ground with the ground pegs supplied.

Completed assembly.
